## Services:

- Design & Build
- Construction
- Cold Storage Construction (Envelope)
- Energy Efficiency Investment Solutions
- Professional Engineering
- CAD Drafting
- Refrigeration Maintenance & Service
- Controls
- Piping
- Rigging
- Electrical
- Parts
- Regulatory Compliance: PSM, EPA, OSHA, Homeland Security, etc.

## REFRIGERATION SYSTEMS CONSTRUCTION & SERVICE CO. (RSCS)

**From design-build to specific trade subcontracting, we offer a wide range of options to ensure dependability and maximum performance.**

Refrigeration Systems Construction & Service Company is a full-service commercial and industrial refrigeration construction and service company. RSCS specializes in the sales, service, design, installation and maintenance of high grade industrial ammonia, CO2 Cascade/Transcritical and Freon systems.

Our technological experts work with a variety of equipment manufacturers to provide a broad range of products and services to customize your refrigeration and HVAC needs.

## REFRIGERATION SYSTEMS ENERGY SERVICES CO.

**You have an energy saving VISION...we have a way to get you there.**

Refrigeration Systems Energy Services evaluates your system's performance and energy usage to deliver proactive energy efficiency strategies. Energy engineering in refrigeration and HVAC systems delivers significant energy savings, along with considering opportunities to reduce your water and chemical usage to improve your facility operations. RSCS and Refrigeration Systems Energy Services work to ensure seamless project fulfillment while using all applicable Federal/State tax rebates & utility incentives for a cost-effective ROI Solution.
